

AEGIS

Care Provider Monitoring System

AEGIS

Care Provider Monitoring System

AEGIS is the latest generation of Homecare Provider Monitoring System to be provided by Jontek and has been developed in response to customer requests for a cost-effective solution that gives greater flexibility, ease of use and improved reliability.

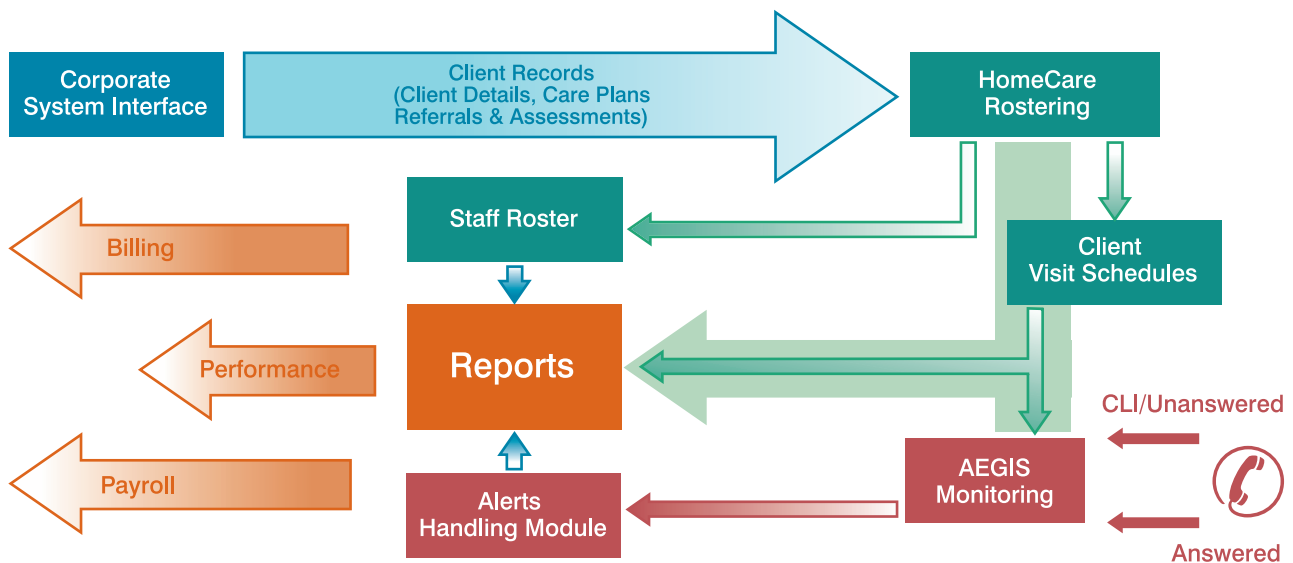

AEGIS utilises state of the art technology to capture real time carer visit information, eliminating the need for timesheet returns and reducing administration effort.

Does not require the purchase of any specialist telephone equipment and no client call charges are incurred, making it simple and cost effective to implement and operate.

Our solutions have been designed to allow integration with existing Social Services Corporate systems, Homecare Rostering systems and will also link to your corporate WAN via the intranet/internet in line with the Government's e-Gif Policy.

AEGIS Care Provider monitoring can also be provided as a stand-alone package with Web based reporting to monitor and report on the internal/external provision of care. Alternatively we are able to offer our Homecare Scheduling and Monitoring systems fully integrated, stand alone or integrated with your existing scheduling system.

Jontek Total Solution

Meets the requirements of IT departments

Our Systems have been developed to comply with all of the current Government legislation for Homecare Providers, namely The National Care Standards, Fairer Charging Policies, CSCI, e-GIF (Government IT Web Standards) and the Electronic Social Care Records (ESCR).

Fully Web-enabled in line with the Government e-GIF Policies.

Allows greater integration between Social Services, Health and Housing, enabling information to be exchanged between their various databases.

Fully Scaleable, AEGIS has no practical limit to the number of Carers being monitored or the number of concurrent users.

Management Reporting

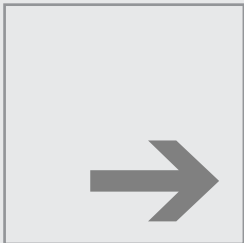

The system has a powerful yet user friendly reporting facility which allows our clients to meet the increasing demands of Government for accountability and to provide extensive statistical and financial information on the range of Homecare Services they provide.

Hosted Solution

AEGIS is provided as a hosted solution allowing secure remote access via a Web Browser. All Remote Web communication is fully encrypted. All computer and telephony equipment is hosted by our secure data centre partner and maintained by Jontek 24 hours per day, 365 days of the year.

AEGIS utilises state of the art technology to capture real time carer visit information.

AEGIS Features

Finance

AEGIS can export qualified information to allow accurate Client Invoicing, Staff Payroll and Purchaser Billing. The system can also interface to a wide variety of financial systems e.g. Sage, Pegasus etc.

Security Manager

The System has a powerful and flexible in-built security manager which allows it to be tailored to meet your needs in terms of accessibility of information covering a wide range of personnel with varying functions and requirements.

Auditing and Trace-ability

A powerful feature of the system is that it allows for full auditing and trace-ability of all actions carried out. The audited information can then be reported on giving an overall understanding of how the system is being administered.

Real Time Alerts

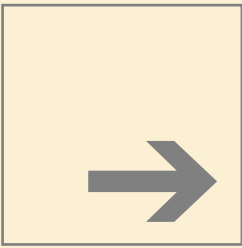

One of the most important features of the system is to provide a safety mechanism for carers and clients. It provides reassurance to both parties that the system will always be keeping a watchful eye on them for any potential problems whilst providing care. In the event of a problem arising the system can generate real time ALERTS to ensure any issues are highlighted early for immediate attention and remedial action.

Voice Mail

Messages can be exchanged between Carers and their Supervisors using voice mail. Also, a voice mail message in relation to the visit can be tagged to the visit record for future verification and authorisation.

AEGIS Benefits

- Reduces administration and eliminates the need for timesheet returns.
- Independent verification of staff hours, mileage and travel time expenses.
- Provides Reassurance for Care workers and helps organisations meet Health & Safety obligations and duty of care to employees.
- Helps Organisations to comply with the Government's National Care Standards and Fairer Charging Policies.
- Leads to improved communication. Voice mail messages can be exchanged between Care staff and their Supervisors.
- Flexibility. The system can be used as a stand-alone solution or can interface to a Staff Rostering system thus allowing enhanced reporting on performance.
- Captures all of the care visit information required for reporting and verification, e.g. Staff ID/Client ID, start time, duration and services provided etc.
- Real Time, 24-hour Care Visit Monitoring, 365 days of the year.
- Alert sent out if an essential care visit does not go as planned.
- Ensures carers arrive on site and leave safely
- Ensures ALL vital client care visits take place
- When an alert is raised a number of actions can be predefined e.g. send an SMS text message to the supervisor.
- Provides a full audit trail of all actions and events
- The system can interface to your corporate systems for Billing and Payroll.

Meeting the needs:

of Care Purchasers

- Records the actual care received.
- Confirms the adherence to contractual commitments.
- Cost effective with NO special equipment required to record carers' visits.
- Supports National Care Standards, the Governments Fairer Charging and e-GIF policies.
- Complies with the BS Standards for ensuring essential visits are highlighted for attention.

of Care Providers

- Staff safety is increased by the real-time monitoring of the carers.
- Real-time recording eliminates the need for timesheet returns.
- Independent verification of staff hours, mileage and travel time expenses
- Staff efficiency can be more carefully monitored
- Independent and accurate information can be provided for Staff Payroll and Client Billing.

of Clients

- Any missed visits will be highlighted and can then be followed up to ensure continuity of care.
- Contributes significantly to improving the overall quality of care.
